

everteam.discover

Analyze, remediate, retrieve and govern your information

All companies have multiple information silos (ERP, file sharing systems, messaging, collaborative tools, etc.). Over time, these tools become clogged, deteriorate and lead companies to lose control of their information capital, thus increasing risks and costs.

everteam.discover allows you to analyze, remediate, govern and access your information wherever it is from a single solution. Nothing will be easier than to:

- **Retrieve** important documents in case of a dispute with a third party,
- **Identify** duplicate documents or even the latest version of a document,
- **Have an operational** dashboard to help maintain GDPR compliance,
- **Manage** the life cycle of documents wherever they are located in accordance with the retention schedule in force,
- **And much more !**

Fields of application

Data cleansing

Identify and clean up unnecessary or obsolete content and track sensitive information to reduce costs and risks.

Maintaining compliance

Facilitate compliance with industry regulations (e.g. GDPR) by detecting important or at-risk data wherever it resides.

Records Management

Ensure perfect information governance by automatically identifying binding documents and enforcing your retention and life cycle management policies, without the need to migrate your documents and data.

Smart search / 360°view

Automatically extract useful information (business, commercial, sensitive) wherever it is located. Find information faster and have personalized 360° views of your data.

everteam.discover

Analyze, Remediate, Retrieve and Manage all your organization's information

Key functions

- **Multi-source connectors** (network disk, Sharepoint, Exchange, SAP, etc.) ready to use
- **Classification functionalities** by rule or by automatic learning (AI - Machine Learning)
- **Automatic detection of noteworthy** data (TAL - Name Entity Extraction) to enrich content
- **Life cycle application** on content wherever it resides and governance in accordance with the company's retention policy
- **Intelligent search** (semantic expansion, and so on): multilingual and federated
- **Creating self-service dashboards** to search and find needed information more efficiently

Key benefits

- **Analyze, enrich, classify,** retrieve and act on information
- **Identify sensitive or business data** anywhere, even within documents
- **Migrate your content** to an EAS or to the cloud
- **Implementing** retention policies (RM)
- **Get a 360° view of your information** and make it easier for end-users to find it

For information governance managers

Minimize risk by ensuring that corporate information is secure, accurate, and well managed in accordance with current archiving policy.

For business users

Get a 360° view of your information across silos with custom search tools and dashboards.

For IT managers

Reduce management and storage costs and have a «data hub» that centralizes access to information.

About us

Everteam is a software editor specialized in content management, EDM, electronic archiving and information governance. We are constantly innovating to offer our customers simple solutions that allow them to build, secure and enhance the value of all their information, while reducing costs and risks.
